PROFESSIONAL PROFILE

Operations professional at Amazon RUH8, Riyadh, selected from the associate team within two months to serve as Pack Process Assistant / Outbound Problem Solver. Leads Multi-Slam Pack activities across shifts, monitors packer and process-path UPH against targets, and works with Area Managers and Supervisors to redeploy associates as volume demands. Holds a BSc in Computer Science & Engineering and builds practical operations tools, including a labor planning calculator and a CPT risk board, bringing a data- and technology-driven approach to the warehouse floor.

CORE SKILLS

Operations: Shift Coordination | Outbound Operations | Workflow Support | Operational Problem-Solving | Order Fulfillment | Quality & Accuracy | Peak Volume Support

Team Support: Associate Task Allocation | Associate Coaching | Training Support | Cross-Functional Communication | Coordination with Area Managers and Supervisors

Performance & Planning: UPH Monitoring | Process-Path Performance Tracking | Labor Planning | CPT Risk Tracking | Bottleneck Analysis | Data-Informed Decisions

Systems & Tools: Amazon Internal Systems | Microsoft Excel, Word & Outlook | Web-Based Tool Development

PROFESSIONAL EXPERIENCE

Amazon RUH8 — Riyadh, Saudi Arabia **Jul 2025 – Present**

Employed through a third-party service provider

Pack Process Assistant / Outbound Problem Solver Sep 2025 – Present

- Selected from the associate team after two months, based on consistent performance and support to leads during peak volume.
- Led Multi-Slam Pack team activities across multiple assigned shifts, supporting workflow continuity and operational targets.
- Monitored individual packer UPH, process-path UPH and performance targets using Amazon internal systems.
- Used productivity data to inform decisions on associate deployment and task allocation.
- Coordinated with Area Managers and Supervisors to assign or reassign associates across tasks and process paths based on operational needs.
- Resolved outbound operational issues and supported order accuracy, quality standards and efficient workflow execution.
- Coached new associates and supported Learning Ambassadors with associate training.

Warehouse Associate Jul 2025 – Sep 2025

- Consistently met the 120 UPH picking target and quality standards.
- Supported management during high-volume and peak demand periods.
- Shared process knowledge with colleagues, Team Leads and Supervisors.

PROJECTS

Labor Planning Calculator — Bilingual shift planner that converts volume forecasts and planned rates into headcount per process path, identifies the bottleneck path and suggests flex moves.
shadlabs.github.io/labor-planning-calculator

CPT Risk Board — Live outbound tracker that projects finish times for each CPT from packers on line, pack rate and units remaining, flagging risk early.
shadlabs.github.io/cpt-risk-board

KSA Helper — Bilingual guide that directs Saudi residents to the right official service, with a private document-expiry tracker.
shadlabs.github.io/ksa-helper

EDUCATION

BSc Computer Science & Engineering — Second Class Upper 2019 – 2023

Kings University College, Ghana
